

NAME: _____

Web Exercise: Navigating the Chem 124 Online Syllabus

The purpose of this exercise is to familiarize you with all the features of the web pages I have set up for Chem 124. Remember that these web pages are essentially your syllabus to this course, so I want you to know what is available there for your information. You will get **10 points** if you turn this in and all info is correct. It is due Thursday, January 5th at the start of class.

1. Where is my office? (Building and room number) _____
2. What time is my office hour on Thursday? _____
3. What materials are required for this course *besides* the textbook? Write them below.
4. How many hours do I recommend you spend on Chem 124 outside of class? _____
5. How many exams are scheduled for Chem 124 (not including the final)? _____
6. What is the date of Exam 1? _____
7. What percentage of your final grade is each lab report worth (approximately)? _____
8. When will we be performing the Heat of Sublimation experiment? _____
9. What is the date for the first (non-diagnostic) quiz? _____
10. When is the final for this course? _____
11. What sections are required in your lab notebook before the lab? Write them below.
12. How many class meetings after the due date can you turn in a lab report for some credit? _____
13. What is the highest score (as a percentage) you can receive on a "late" lab report? _____
14. Give one mistake with the "bad" graph on the web page that a student should fix below. _____
